

VIJAY KUMAR DEBARKI

Offensive Security · Penetration Testing | Blue Team (SOC)

Visakhapatnam, Andhra Pradesh | vijaydebarki@gmail.com | +91 9652025033

[linkedin.com/in/vijay-debarki-131a8014a](https://www.linkedin.com/in/vijay-debarki-131a8014a) | [vijaydebarki.github.io](https://github.com/vijaydebarki) | [Credly badges](#) | [TryHackMe](#) | [HackTheBox](#)

SUMMARY

Offensive-security focused IT and security professional, certified in ethical hacking (Cisco Ethical Hacker, Edureka CSEH) and ranked in the **top 5% of TryHackMe globally** with **Hacker rank on HackTheBox**. Hands-on with reconnaissance, web application testing, exploitation and privilege escalation, and currently completing the TryHackMe Jr Penetration Tester and HTB Academy CPTS paths. Backed by real-world experience securing FortiGate NGFWs, Active Directory, Microsoft 365 and Azure environments since 2022, and building SOC Level 1 detection skills to understand how attacks are found and stopped.

HIGHLIGHTS

- **TryHackMe:** Top 5% globally (rank #134,521) · 103 rooms completed · 19 badges · level 0x9 [MAGE]
- **HackTheBox:** Hacker rank · Season 8 Ruby tier · Holmes CTF 2025 event certificate · 9 Academy achievements
- **Portfolio:** built [vijaydebarki.github.io](https://github.com/vijaydebarki) — command centers tracking Jr Penetration Tester, CPTS and SOC Level 1 progress, with investigations and write-ups published as Markdown on GitHub

TECHNICAL SKILLS

Offensive Security: Reconnaissance and enumeration (Nmap), web application testing (Burp Suite, OWASP ZAP), exploitation (Metasploit), password attacks (Hydra, John the Ripper), Linux and Windows privilege escalation

Web Application Testing: OWASP Top 10: SQL injection, XSS, IDOR, file inclusion, command injection, broken authentication and session management, API testing

Network & Active Directory: TCP/IP, SMB, LDAP, Kerberos, Active Directory and Group Policy, FortiGate NGFW, SD-WAN, IPsec and SSL VPN, VLANs, Cisco, Wireshark

Blue Team / SOC: Microsoft Sentinel, Defender for Cloud, Cortex XDR, FireEye, Splunk, alert triage, phishing analysis, MITRE ATT&CK

Cloud & Identity: Azure (VNETs, NSGs, Azure Firewall, WAF, Bastion, Key Vault, RBAC), Entra ID, Intune, Windows Autopilot, Microsoft 365, Azure Virtual Desktop

Scripting & Tools: PowerShell, Bash, Python (basics), Azure CLI, ARM templates, Kali Linux

PROFESSIONAL EXPERIENCE

Support Engineer – IT | ACN Healthcare

Oct 2025 – Present

- Configure and maintain FortiGate NGFWs (60E, 100F, 120G, 200G) as the L3 gateway: firewall policies, VLANs, SD-WAN, IPsec site-to-site and SSL VPN, and category-based web filtering.
- Administer Active Directory, Group Policy, Microsoft 365 and mail administration, covering user lifecycle, access and resource management.
- Deploy and maintain Cisco network devices and Wi-Fi access points managed through an EWC controller.
- Support IT auditors with compliance and governance evidence; work alongside client IT teams under shared-privilege access.
- Provide end-user support for operating system and software installation, configuration and troubleshooting.

Lab Tester (Independent Contractor) | Netsoft College of Technology

Oct 2024 – Feb 2025

- Designed and deployed end-to-end Azure lab environments simulating enterprise networking, security and administration scenarios for students.
- Configured Azure network security: VNETs, subnets, NSGs, peering, VPN gateways, ExpressRoute, private endpoints, Azure Firewall, Bastion and load balancers.
- Implemented security monitoring with Microsoft Defender for Cloud, Sentinel SIEM and security baselines; managed Key Vault, encryption and identity-protection policies.
- Managed identity with Azure AD (Entra ID) and RBAC; deployed Azure Virtual Desktop, Intune compliance policies and Windows Autopilot.
- Automated operations with PowerShell, ARM templates and Azure CLI; documented and resolved lab issues in a real IT-operations style.

- Performed hands-on security assessments in lab environments using Nmap, Metasploit, Burp Suite and OWASP ZAP, alongside manual testing techniques.
- Practised web application vulnerability testing, password cracking, malware analysis and forensic investigation.
- Analysed network traffic with Wireshark and studied TCP/IP, DNS, DHCP and HTTP attack surfaces, firewalls, IDS/IPS and VPN security.
- Applied cryptography fundamentals: AES, RSA, SHA hashing, SSL/TLS and digital certificates.

IT Support Engineer | Concentrix

Jan 2022 – Jul 2023

- Monitored endpoint security alerts with Cortex XDR and FireEye and escalated suspected threats.
- Managed Active Directory accounts, groups and permissions; enforced password and access-control policies.
- Applied patches, updates and security configurations across Windows and Linux systems.
- Supported VPN, remote access, Microsoft 365 and Azure services; assisted with compliance audits.
- Automated routine administration with PowerShell and maintained configuration and troubleshooting documentation.

CERTIFICATIONS

- **Earned:** Cisco Ethical Hacker (Credly verified) · Edureka CSEH · EC-Council Wireshark · Google IT Support Professional Certificate · Hack The Box Holmes CTF 2025
- **In progress:** TryHackMe Jr Penetration Tester path · HTB Academy CPTS path · TryHackMe SOC Level 1 path

EDUCATION

B.Sc. Computer Science — Andhra University (SDE), Visakhapatnam

2020

Intermediate (MPC) — Sri Chaitanya Jr. College

2014 – 2016

ADDITIONAL

- **Languages:** English, Telugu
- **Continuous learning:** regular hands-on practice on Hack The Box, TryHackMe and LetsDefend; follow industry research, webinars and security communities.
