SUMMARY

IT Specialist | Azure Cloud & Infrastructure

A skilled IT Specialist with hands-on experience in Azure administration, virtual desktop deployment, cloud security, and endpoint management. Experienced in building real-world IT environments, optimizing cloud solutions, and ensuring security compliance.

Key Expertise:

- Azure Administration & Security – Managed Azure VMs, AAD, cloud networking, and implemented Microsoft Defender, Sentinel, and Key Vault for security monitoring.
- Azure Virtual Desktop (AVD) & Endpoint Management – Designed and optimized AVD environments, managing session hosts, FSLogix, and remote access security. Led Microsoft Intune for device compliance and endpoint security.
- Network & OS Management – Expertise in Windows & Linux systems, firewall configurations, and secure network architecture. Managed RBAC, identity management, and compliance policies.
- Lab Creation & Real-world IT Scenarios – Developed end-to-end Azure labs, simulating cloud networking, security, and system administration.

A results-driven professional with a passion for Azure cloud solutions, IT infrastructure, and security best practices, focused on optimizing operations and ensuring robust security compliance.

TECHNICAL SKILLS

System Administration	O365 Administration	Microsoft Entra ID Administration
Hardware Diagnostics and Repair	Azure Virtual Desktop	Microsoft Intune / MDM
XDR: Cortex, FireEye	Azure Networking	Cybersecurity
Active Directory	Azure Administration	Azure Security: AZ FW, WAF, Sen

PROFESSIONAL EXPERIENCE

Support Engineer - IT, ACN Healthcare

Oct 2025 - Present

- Providing support to End Users With Software Installation, Operating System Installation, Configurations on End Devices
- Providing Administration Support to organisation which includes creation, modifying, deletion of users and resources in Active directory, Mail Admin panel, Voice applications, O365 Admin portal.
- Working on Network related tasks which includes deploying/Managing/Maintaining network devices.
- Working on Network devices like Cisco products, Wifi Accesspoints with EWC controller, Fortigate NGFW
- Worked on managing fortigate products like 60E, 100F, 120G, 200G
- Supported in Network security related tasks like configuring SDWAN, Interfaces, Vlans, utilizing fortigate products as L3 Gateway, Web Filtering, IPSec site2site, ssl vpn, Webfiltering using fortigate category filters.
- worked on Group policy object for managing hosts for gp edits
- Worked with IT Autitors to maintain complaince and governance
- Worked closely with client IT teams with shared privileges to maintain smooth operations.

Lab Tester, Independant Contractor, Netsoft College of Technology Oct 2024 - Feb 2025

- Deployed and managed Azure Virtual Machines (VMs), Storage Accounts, and Resource Groups.
- Configured Azure Active Directory (AAD), role-based access control (RBAC), and identity management.
- Automated Azure operations using PowerShell, ARM templates, and Azure CLI.
- Set up and managed Azure Virtual Desktop (AVD) environments, including session hosts, host pools, and user profile configurations.
- Optimized AVD performance, ensuring secure remote access for end-users.
- Designed and configured Azure Virtual Networks (VNETs), Subnets, NSGs, and Peering.
- Implemented VPN gateways, ExpressRoute, and private endpoints for secure connectivity.
- Configured and monitored Azure Firewall, Azure Bastion, and load balancers.
- Configured Azure Defender, Sentinel SIEM, and security baselines for threat monitoring.
- Managed Azure Key Vault, encryption policies, and identity protection strategies.
- Designed and deployed end-to-end Azure lab environments simulating enterprise use cases.
- Provided students with real-world scenarios involving cloud security, networking, and system administration.
- Documented and troubleshooted Azure issues, mimicking real IT support & cloud operations.
- Configured and managed Microsoft Intune for device enrollment, compliance policies, and endpoint security.
- Deployed and monitored Windows Autopilot for automated device provisioning.

Internship Program, Edureka

Aug 2023 - Dec 2023

- Gained hands-on experience with Windows & Linux system administration and security.
- Understood network protocols (TCP/IP, HTTP, DNS, DHCP, etc.) and their vulnerabilities.
- Learned firewall configurations, IDS/IPS, and VPN security for network protection.
- Explored encryption techniques (AES, RSA, Hashing - SHA, MD5) for securing data.
- Understood SSL/TLS security, digital certificates, and secure authentication methods.
- Learned about application security vulnerabilities
- Worked with industry-standard tools like Wireshark (packet analysis), Nmap (network scanning), Metasploit (exploitation), and Burp Suite (web security testing).
- Learned password cracking, malware analysis, and forensic investigation techniques.
- Used Burp Suite, OWASP ZAP, and manual testing techniques for security assessments.

IT Support Engineer, Concentrix

Jan 2022 - Jul 2023

- Assist in the installation, configuration, and maintenance of operating systems (Windows/Linux).
- Monitor system performance and troubleshoot issues to ensure optimal functionality.
- Apply system updates, patches, and security configurations.
- Create and manage user accounts, groups, and permissions in Active Directory.
- Provide technical support to end-users, resolving hardware, software, and network issues.
- Enforce security policies, including password management and access controls.
- Support VPN, remote access, and cloud services (e.g., Microsoft 365, Azure).
- Monitor cybersecurity threats using endpoint security solutions like Cortex XDR, FireEye.
- Assist with compliance audits and security best practices.
- Maintain system documentation, including configurations, procedures, and troubleshooting guides.
- Assist in automating routine administrative tasks using PowerShell or scripting.

EDUCATION

Bachelor of Science in Computers

Aug 2020

Andhra University SDE | Visakhapatnam

- Computer Science

Board Of Intermediate

May 2014 - May 2016

Sri Chaitanya jr. College

- Mathematics, Physics, Chemistry

ADDITIONAL INFORMATION

- **Languages:** English, Telugu
- **Certifications:** Cisco Ethical Hacker Badge (Credly), Edureka CSEH, Wireshark Ec-council, Google IT Support
- **Activities:** To stay updated on the latest technology and cybersecurity trends, I follow industry blogs, join online communities, attend webinars and conferences, and continuously learn through courses, podcasts, and hands-on labs.
- To stay updated on the latest technology and cybersecurity trends, I practice labs on platforms like Hack The Box, TryHackMe, and LetsDefend.io, while also following industry blogs, attending webinars, and engaging with online communities.
